Skills

- **System Administration & OS:** Linux (Ubuntu/Debian), RBAC management, Storage & Partitioning, UEFI/GRUB Boot Management, Bash Shell Scripting, Preventive Maintenance, System Backups.
- **Networking & Security:** TCP/IP Suite, LAN/WAN Setup & Routing, Network troubleshooting, UFW Firewall Configuration, Technical Support, Basic Networking.
- **Technical support**
- **Network troubleshooting**
- **Tools & Infrastructure:** Technical Ticket Documentation, Git & GitHub Version Control, Microsoft Office Suite.
- **Tools & Infrastructure:** Version control, Cloud Services, Ticket documentation, Microsoft Office Suite.
- **System administration**

Education

Bachelor Of Science:

Information Systems

Maseno University — School Of Computing And Informatics

- **Status:** Completed coursework; awaiting official graduation on 13th November 2026.
- **Classification:** Second Class Honours (Upper Division)
- **Industrial Attachment:** Completed with Grade A (Excellent).
- **Relevant Coursework:** Software Engineering, Database Administration, Systems Analysis & Integration, Information Systems Security, Web Applications Server Programming, LAN Design & Implementation.

BINALE RODNEY KHABANJE

Summary

Detail-oriented Systems Administrator & Network Security Specialist with a Bachelor of Science in Information Systems. Expertise in managing Linux environments, configuring TCP/IP networks, and automating vulnerability audits with Python. Experience includes technical support, UFW firewall management, socket programming, digital forensics, and full-stack web development. Delivering effective user access controls, troubleshooting system issues, and ensuring high uptime across IT infrastructures.

Experience

Kibabii University — ICT Support / System Administrator (Attachee)

05/2025 – 08/2025

- Provided frontline technical support and troubleshooting for staff and student network and system issues.
- Administered user accounts, performed preventive maintenance, and ensured timely system backups.
- Installed, configured, and maintained computer hardware and software to support departmental operations.
- Documented technical support tickets and resolutions while maintaining equipment logs for future reference.

Projects

CyberSentinel — Vulnerability Scanner & System Auditor | Python 3, Linux, Sockets, Threading

- GitHub: github.com/BINALE540/cybersentinel
- Engineered a zero-dependency, multi-threaded security auditing CLI tool in Python 3 designed for Linux server environments.
- Implemented asynchronous TCP socket probing across critical ports (22, 80, 443, 3306, 5432) to rapidly detect active services and potential entry points.
- Built an HTTP/HTTPS security header auditor with automatic protocol fallback to evaluate HSTS, CSP, and X-Frame-Options policies.
- Integrated local Linux host inspection to audit UFW firewall rules and OS build parameters, exporting structured, timestamped JSON reports for logging and analysis.

Maseno Foods Hub — Campus Web Platform | PHP, MySQL, JavaScript, HTML5/CSS3

- Architected and deployed a responsive web-based food ordering platform designed for university students and local campus vendors.
- Structured relational database schemas in MySQL, implemented secure user session management, and optimized query handling.

Interactive Terminal Web Portfolio | Next.js, TypeScript, Tailwind CSS, Vercel

- Developed a dark-mode portfolio featuring an interactive terminal shell modal capable of parsing custom CLI commands (help, skills, projects, resume).
- Implemented typewriter header animations, responsive component card layouts, and automated continuous deployment (CI/CD) pipelines via GitHub and Vercel.
