PROFESSIONAL SUMMARY

Detail-oriented **Information Systems Graduate** from Maseno University specializing in Linux System Administration, Network Engineering, and Systems Security. Skilled in configuring resilient Linux environments, managing TCP/IP network diagnostics, and engineering modular security tools and modern web applications. Proven track record of providing system administration support and building custom cybersecurity tools like *CyberSentinel*. Driven to optimize IT infrastructure, automate security audits, and maintain network integrity.

TECHNICAL SKILLS

System Admin & OS: Linux (Ubuntu/Debian), Storage & Partitioning, Permissions, UEFI/GRUB, Bash Scripting, Maintenance

Networking & Security: TCP/IP Suite, Socket Programming, Port Scanning, UFW Firewall, Troubleshooting, Forensics

Programming & Web: Python 3, TypeScript, JavaScript, PHP, HTML5/CSS3, SQL (PostgreSQL, MySQL), REST APIs, Next.js, Node.js

Tools & Infrastructure: Git, GitHub, Vercel CI/CD, Microsoft Office Suite

PROJECTS

CyberSentinel — Vulnerability Scanner & System Auditor

[GitHub Repository](#) ↗

Technologies: Python 3, Sockets, Threading, Linux

- Engineered a zero-dependency, multi-threaded security auditing CLI tool in Python 3 for Linux environments.
- Implemented asynchronous TCP socket probing to rapidly audit critical ports (22, 80, 443, 3306, 5432) and detect active running services.
- Built an HTTP security header auditor with automatic TLS-to-HTTP protocol fallback to evaluate HSTS, CSP, and X-Frame-Options policies.
- Integrated local Linux host inspection to audit UFW firewall status and OS build parameters, exporting structured JSON reports for SIEM integration.

MicroService Guard — Auth Gateway

In Progress

Technologies: TypeScript, Node.js, Express, PostgreSQL, OAuth2

- Engineering a high-performance reverse proxy handling JWT token rotation, rate limiting, and secure RBAC access control for distributed microservices.

Interactive Terminal Portfolio

[Vercel Deployment](#)

Technologies: Next.js, TypeScript, Tailwind CSS, Vercel

- Built a terminal-inspired, dark-mode technical portfolio featuring a responsive layout, animated typewriter header, and an interactive Web CLI modal overlay.
- Automated continuous integration and continuous deployment (CI/CD) pipelines using GitHub and Vercel.

PROFESSIONAL EXPERIENCE

ICT Support / System Administrator (Volunteer) — Kibabii University

May 2025 – Sep 2025

- Installed, configured, and maintained computer hardware, software, and local network setups across departments.
- Provided frontline technical support and network troubleshooting for staff and student workstations.
- Managed user account administration, system backups, and equipment maintenance logs.

EDUCATION

Bachelor of Science in Information Systems **Second Class Honours (Upper Division)**

Graduating Class of Nov 2026

[Maseno University](#)

Status: Completed coursework; Industrial Attachment completed with Grade A (Excellent).

Relevant Coursework: Information Systems Security, LAN Design & Implementation, Systems Analysis & Integration, Web Applications Server Programming, Database Administration
